Amyloidosis Foundation Accepting Applications for Research Projects

JUNE 9, 2018
Deadline: September 14, 2018

The Amyloidosis Foundation focuses on raising awareness in the medical field of amyloidosis, a group of diseases in which abnormal protein, known as amyloid fibrils, builds up in tissue; educating medical professionals through its Grand Rounds program and attendance at medical conferences; prioritizing a research agenda through grants and partnership with the Amyloidosis Research Consortium; and empowering patients through its comprehensive range of services, including accurate, up-to-date information.

To that end, the foundation will award grants of up to $50,000 in support of basic biomedical and clinical research related to systemic amyloidosis.

To be eligible, applicants must be within ten years of completion of their postdoctoral studies or clinical fellowship and have a mentor.
See the Amyloidosis Foundation website for complete program guidelines and application instructions.
